made for the outdoors

Few decorative elements have as much impact on their surroundings as a mirror. Deknudt Mirrors translates its 80 years of experience into innovative mirrors specifically developed for outdoor use.

Hoop Outdoor

Lucka Outdoor

new perspectives

These mirrors create new perspectives through which to enjoy your gardens and terraces, catching & reflecting light, extending views and revealing new vistas from unexpected angles.

weather proof

Rain-, sun- and windproof. The silver layer and durable finish of these mirrors is specially treated to withstand exposure to the elements. A secure outdoor suspension system keeps them firmly in place.

beyond reflection

Oculus is a sculptural outdoor design object. Appearing to be set into the ground, it reveals an ever-changing view of the sky, the treetops and surrounding landscape. Its oblique angle creates the illusion of a cylindrical viewing tube that seems to emerge from underground.

Oculus
designed by Jonas Van Put

One day in 1946, my grandfather Frans Deknudt decided to make a mirror. Not just any mirror, but one that was more beautiful, more innovative and of higher quality than those available at the time. That ambition became the foundation of Deknudt Mirrors. 80 years later, we are proud to continue that same vision as a third-generation family-owned business.

Jan Deknudt,
Managing director / third generation
